

How a shield is awarded

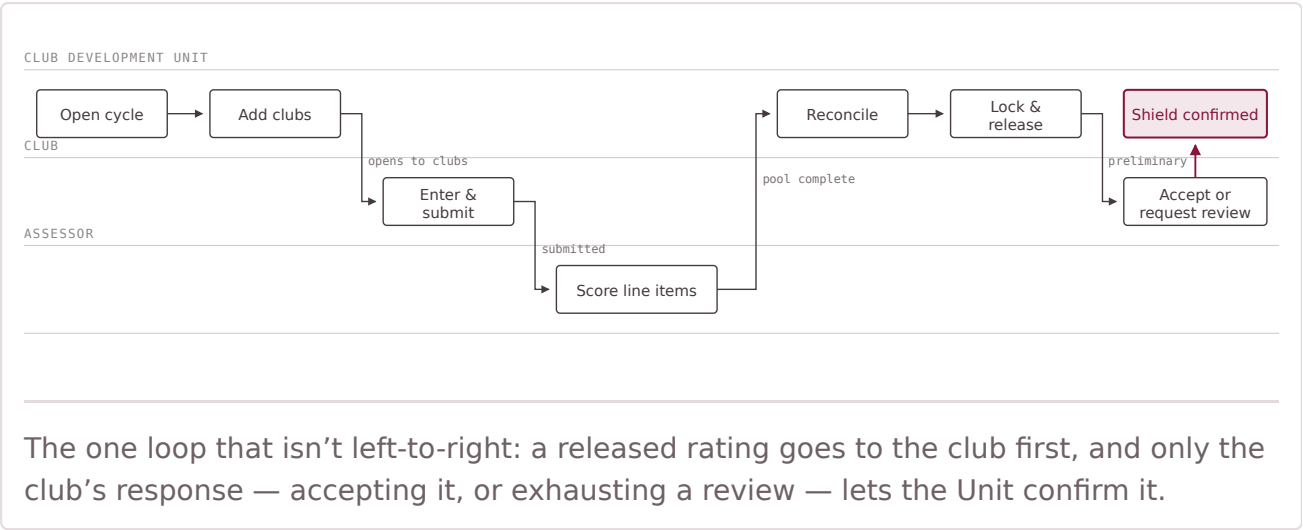

The whole season, end to end: who does what, what the portal computes, and the point at which a club may finally display its shield.

2026 cycle 3 roles 54 line items 9 Non-Negotiables 1,332 points

The season at a glance

OVERVIEW

Three roles touch an assessment, and they hand it between them in a fixed order. The Club Development Unit opens the season and closes it; clubs supply their own data; assessors score. Nobody skips a step, and only the Unit can move an assessment backwards.

The one loop that isn't left-to-right: a released rating goes to the club first, and only the club's response — accepting it, or exhausting a review — lets the Unit confirm it.

1 Open the season

CLUB DEVELOPMENT UNIT

A cycle is one season's assessments. It starts in **SETUP**, where clubs can't see it, so the Unit can build the season out before anyone is invited in.

THE UNIT DOES

- Creates the cycle for the year, from the board at **/cda/cdu**.
- Adds each affiliated club with its zone and tier.
- Creates one administrator account per club and hands over the sign-in link shown on screen.
- Creates assessor accounts, and groups clubs into **pools**.
- Allocates every line item across each pool — two assessors per item, plus a third only to break a split.
- Moves the cycle to **CLUB_ENTRY** when clubs should start.

THE PORTAL DOES

- Loads Football Queensland's rubric automatically — 54 line items, the nine Non-Negotiables, the qualification ladder and the structure standards. Nothing to configure.
- Gives the new cycle its per-shield structure standards.
- Opens an assessment for every club in the cycle, with a blank result row for each Non-Negotiable.
- Sets each shield's bar: Gold 75%, Silver 55%, Bronze 40%.

Sign-in links are single use and shown once. Hand over the link the Clubs page displays. A new administrator asking for their own on the login page will be told one is on its way and get nothing, because the invite already issued is still live.

2 The club submits its data

CLUB ADMINISTRATOR

Four sections, all editable until the club presses submit. After that the club can read everything and change nothing — only the Unit can reopen it.

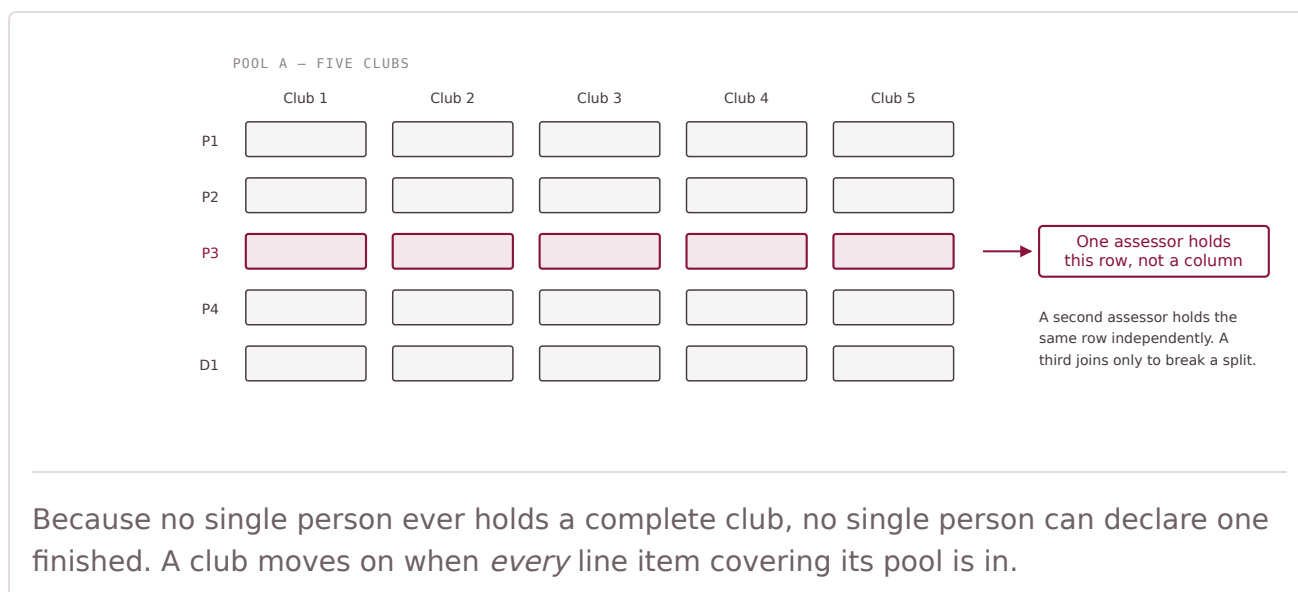

SECTION	WHAT IT HOLDS	WHAT IT FEEDS
Staff register	Every technical role, with qualification, years, employment basis and Blue Card	The whole Technical Qualifications domain
Club structure	Eleven organisational functions, who holds them, and their diploma	NN7 — computed, not judged
Non-Negotiables	A yes or not-yet against each of the nine, with evidence attached	Eligibility, and the shield cap
Participation	Registration, retention, female and youth figures	Outcomes line items

The structure page is the one place a club sees its own score as it works. Every other number stays hidden until release, because every other number is an assessor's judgement. This one is a published rule, so a club that learns in March that Gold needs a qualified Head of Individual Development can appoint one before the season starts.

3 Assessors score, one line item at a time

ASSESSOR

An assessor does not take a club. They take *one line item across a whole pool of clubs* — every club's Playing Style, say, one after another. That is how Football Queensland allocates, and it is what makes two assessors comparable: they are judging the same thing repeatedly rather than different things once.

THE ASSESSOR SEES

- Their allocated line items, and for each, the list of clubs in that pool.
- The club's evidence and submitted documents.
- A 0–3 or 0–4 scale with Football Queensland's evidence bands.

THE ASSESSOR NEVER SEES

- What the other assessor on the same item scored.
- Any club's total, percentage or shield.
- Clubs outside the pools they hold an item in.

4 The Unit reconciles

CLUB DEVELOPMENT UNIT

Two independent scores per line item become one. The reconcile screen opens on the disagreements rather than on all 54 rows, because the job is getting through the splits and a full list of settled ones is how the two that matter get lost.

FLAG	MEANING	WHAT THE UNIT DOES
Agreed	Both assessors gave the same score	Accept in bulk
1 star apart	A minor split	Resolve, usually to the median
2+ stars apart	A major split	Read both comments, decide, and record why
Not scored	Nobody was allocated the item	Allocate it — it counts as zero otherwise

The Unit also verifies each of the nine Non-Negotiables, and writes a paragraph of feedback per macro-area — the part of the report a club can actually act on. A domain percentage says Delivery was 63%; an area note says match day was the problem and training wasn't.

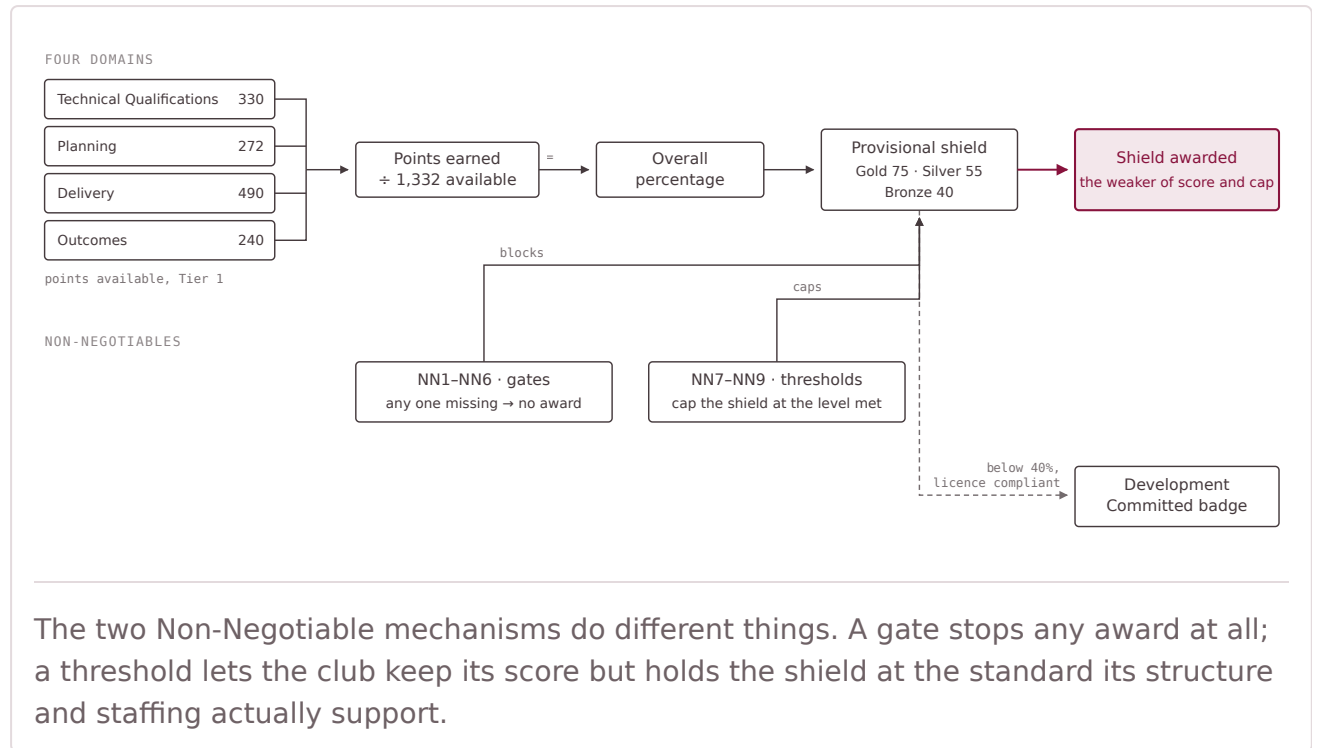

Departing from a suggestion always costs a sentence. Overriding the assessors' median needs a rationale, and so does departing from NN7's computed level. Judgement is allowed; it just has to be visible as judgement rather than indistinguishable from arithmetic.

5

The rating is computed

THE PORTAL

Every line item contributes $\text{score} \times \text{weight}$ to one grand total. A domain's influence is however many points it happens to hold — not a share anybody configured. Delivery is 37% of the rating because 490 of the 1,332 points sit there.

WHERE EACH DOMAIN'S SCORE COMES FROM

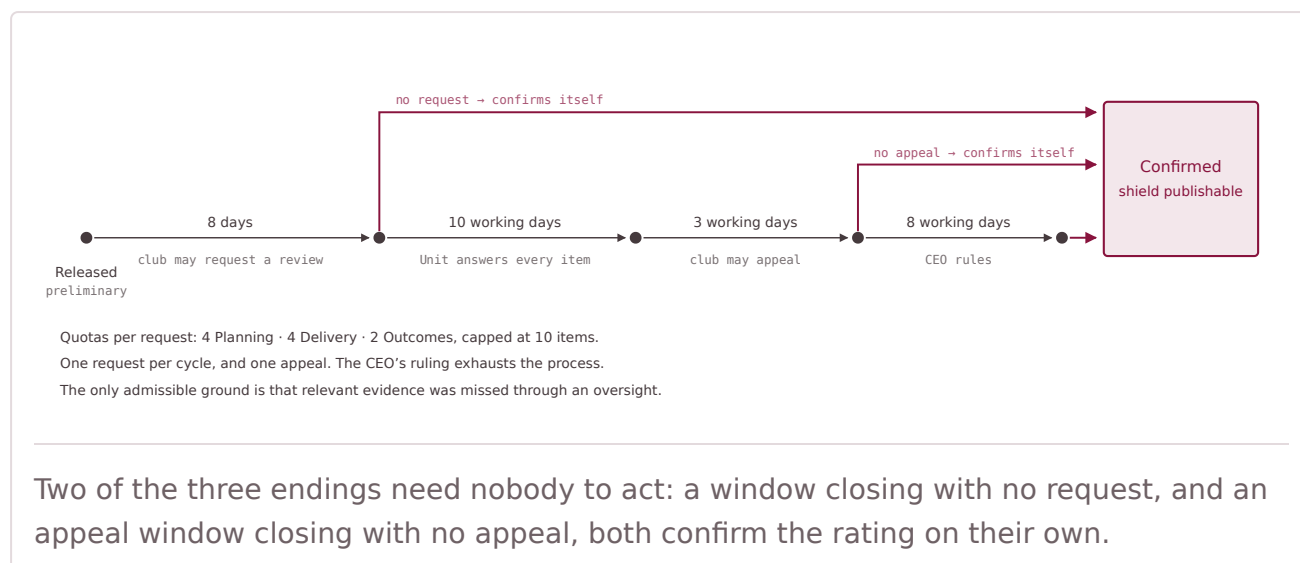

DOMAIN	SCORED FROM	POINTS	SHARE
Technical Qualifications	The staff register — qualification, experience, employment basis, weighted by role	330	24.8%
Planning	15 line items across 5 macro-areas	272	20.4%
Delivery	25 line items, mostly observed at training and on match day	490	36.8%
Outcomes	14 line items, fed by the participation figures	240	18.0%

Tier 2 clubs are assessed on 18 of the same coded line items, with Technical scaled to 112 points, so their percentage comes from a denominator they were actually assessed against.

6 Release, review, confirm

ALL THREE ROLES

Locking freezes the result; releasing shows it to the club. What the club receives is a **preliminary** rating — Football Queensland is explicit that a club may only communicate its rating by displaying its Club Shield once that rating is **confirmed**.

Technical Qualifications cannot be reviewed. It is computed from the staff register rather than judged by an assessor, so a wrong Technical score is fixed by correcting the register — there is no opinion to appeal.

Reference

ASSESSMENT STATUS — WHAT MOVES IT

STATUS	MEANING	MOVED BY
NOT_STARTED	Opened, club hasn't touched it	—
IN_PROGRESS	Club is entering data	The club saving anything
SUBMITTED	Club is done; assessors can score	The club submitting
IN_ASSESSMENT	At least one score is in	The first assessor to save
RECONCILING	Every line item in the pool is in	The last assessor to submit
LOCKED	Result computed and frozen	The Unit locking
PUBLISHED	Preliminary rating with the club	The Unit releasing
IN_REVIEW	Club has challenged specific items	The club requesting a review
UNDER_APPEAL	With the CEO	The club appealing
CONFIRMED	Final. The club may display its shield	A window lapsing, or the CEO ruling

Three moves run backwards, all Unit-only: *reopen* returns a submission to the club, *unlock* clears the frozen result and returns to reconciling, and *withdraw* takes a released rating back from the club. Withdrawal is refused while a review is open.

THE NINE NON-NEGOTIABLES

REF	CHECK	MECHANISM
NN1	Fee transparency	Blocks the shield
NN2	Scholarship positions	Blocks the shield
NN3	Coaches' registration in Squadi	Blocks the shield
NN4	Fielding teams and squad numbers	Blocks the shield
NN5	Technical Director qualification	Blocks the shield
NN6	Technical staff qualifications and Blue Cards	Blocks the shield
NN7	Club structure standards	Caps the shield — computed
NN8	Coaching standards	Caps the shield
NN9	Training program standards	Caps the shield

An unverified check counts against the club exactly as a failed one does. “Not yet looked at” can never resolve in the club’s favour, which is the whole reason the gate exists.

WHAT A CLUB IS AWARDED

AWARD	BAR	ALSO REQUIRES
Gold	75%	All six gates met; the Gold structure, coaching and training standards
Silver	55%	All six gates met; the Silver standards
Bronze	40%	All six gates met; the Bronze standards
FQ Development Committed	< 40%	Licence compliant in non-technical areas. A badge, not a shield

There is no Platinum. Gold is the top, and the portal will not offer a level Football Queensland does not issue a shield for.

WHO SEES WHAT

	CLUB	ASSESSOR	UNIT
Its own submitted data	Yes	Assigned clubs only	Yes
Line-item weightings	No	No	Yes
Individual assessor scores	No	Own only	Yes
Assessor names	No	No	Yes
Its own rating	After release	No	Always
Macro-area grades and notes	After release	No	Always
Its structure standard	Immediately	No	Always
Any other club	No	Within its pools	Yes
